

Global Restricted Substances Expertise

Intertek Assuris

Offering comprehensive solutions for compliance with restricted substance laws, regulations, and requirements.

Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

Intertek provides the following REACH-related services for restricted substances in articles:

- Regulatory training (onsite/webinar): Training and education on REACH requirements.
- Ad hoc consulting: Information on how articles are regulated under REACH, how to ensure compliance with REACH, and how to develop a compliance strategy.
- Product requirements analysis: Analysis of the product requirements under REACH.
- Material/supplier risk assessment: Risk assessments and risk mitigation strategies for Bill of Materials (BoM).
- Testing strategy support: Support for, and determination of, appropriate testing strategy.
- Exemptions analysis: Investigation into product benefits from the exemptions offered by REACH.
- Notifications for articles (REACH IT): Submission of notifications to the European Chemicals Agency (ECHA) in cases where substances of very high concern (SVHCs) have been identified.
- Reporting: Support in writing reports declaring the absence of REACH SVHCs and substances listed in REACH Annex XVII and Annex XIV.

Restriction of Hazardous Substances (RoHS)

Intertek provides support for:

- European Union (EU) RoHS;
- Saudi Arabia RoHS (IECEE Certificate Registration);
- United Arab Emirates RoHS; and
- Other RoHS regulations worldwide.

Specifically, Intertek provides the following RoHS-related services:

- Regulatory training (onsite/webinar): Training on the requirements of RoHS regulations worldwide.
- Ad hoc consulting: Information on whether or not the product falls under the RoHS scope in each country; advice on how to be compliant with the requirements of RoHS from supply chains, labelling, through to the certification and bringing the product to the market; investigation into whether the product can benefit from any applicable exemptions in each country.
- Testing strategy support: Support for, and determination of, appropriate testing strategy.

- Technical file creation: Support for the creation of required technical files.
- Notified Body service: Assessment of the conformance of certain products before they are placed on the market.
- Material/supplier risk assessment: Risk assessments and risk mitigation strategies for the customer's BoM (Note: Each article can be justified as low risk either through the composition of the component/material, documentation collected for the specific components/materials, or through risk mitigation strategies).
- Restricted Substances Control (RSC) program: One-day onsite workshop to educate customers on the restricted substance requirements and train them on how to implement an internal RSC program (Note: If a customer is 9001/14001 registered, Intertek can assist with utilizing those processes for creating a RSC program specific for RoHS and other global requirements).
- Reconciliation: Liaising with the required authorities for reconciliation and prepare the required technical documentation and mitigation actions when a product has mistakenly been placed on the market.
- Certificate & registration: Registration of products with the applicable country authorities and issuance of the certification.

Waste from Electrical and Electronic Equipment (WEEE)

Intertek provides the following WEEE-related services for restricted substances in articles:

- Regulatory training (onsite/webinar): Training and education on the requirements of the WEEE directive.
- Ad hoc consulting: Assessment and determination of the responsibility of a producer or distributor under the WEEE directive.
- Regulatory assessment: Investigation into the requirements of the WEEE directive in each country.
- Jurisdiction reporting: Periodic reporting as required by the applicable national laws.

California Proposition 65

Intertek provides the following California Proposition 65-related services for restricted substances in articles:

- Regulatory training (onsite/webinar): Training for clients to bring awareness on the requirements of California Proposition 65.
- Ad hoc consulting: Expert advice on product labelling under California Proposition 65.
- Material risk assessment: Risk assessments based on the product's BoM to determine which of the 980+ Proposition 65 substances are at risk of being present.
- Testing strategy support: Support for, and determination of, appropriate testing strategy.
- Exposure assessment: Performance of exposure assessment to determine whether the product will expose the end-user to any substances above the maximum allowable daily limit (MADL).

SCIP Database Support for The EU Waste Framework Directive (WFD)

Intertek provides the following compliance solutions for the Waste Framework Directive (WFD):

- Supplier engagement and management
- Material risk assessment
- Product and material SVHC screening
- Data preparation and submission
